

NUSCALE POWER

Legal Issues

James Curtiss

July 24, 2008

U.S. Nuclear Regulatory Commission
Pre-Application Meeting
Rockville, MD

Outline

- Certification of Multi-Modules
- Assessment of Part 171 Fees

Certification of Multi-Modules

- **DC application will seek certification for a multi-module plant**
 - Issues associated with the subsequent addition of modules and multi-module operation will be resolved in design certification (e.g., shared/ common systems, construction during operation)

- **COL applicant will reference the multi-module design certification**
 - Site-specific issues will be focus of COL review
 - Single COL would permit the addition of modules and operation of the multi-module plant referenced in design certification
 - COL holder would build/operate modules as demand necessitates
 - 40-year period for individual modules would begin upon finding by Commission that acceptance criteria are met under 52.103(g) for individual modules

Assessment of Part 171 Fees

- As a single COL would be issued referencing the multi-module design certification, a single annual fee would be assessed under Part 171 for a COL review.
